INDEPENDENT AUDITOR'S REPORT

To the Board of Directors
of Bosque County Central Appraisal District
Meridian, Texas

Report on the Audit Financial Statements

Opinions

We have audited the financial statements of the governmental activities and the major fund of Bosque County Central Appraisal District, as of and for the year ended December 31, 2022, and the related notes to the financial statements, which collectively comprise the Bosque County Central Appraisal District's basic financial statements as listed in the table of contents.

In our opinion, the accompanying financial statements present fairly, in all material respects, the respective financial position of the governmental activities and the major fund of the Bosque County Central Appraisal District as of December 31, 2022, and the respective changes in financial position and, where applicable, cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (GAAS) and the standards applicable to financial audits contained in Government Auditing Standards, issued by the Comptroller General of the United States. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of Bosque County Central Appraisal District and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Responsibilities of Management for the Financial Statements

Bosque County Central Appraisal District's management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about Bosque County Central Appraisal District's ability to continue as a going concern for one year after the date that the financial statements are issued.

NEW MEXICO | Albuquerque

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinions. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of Bosque County Central Appraisal District's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about Bosque County Central Appraisal District's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the required supplementary information, such as management's discussion and analysis, budgetary comparison information, the schedule of changes in net pension liability and related ratios, and the schedule of contributions, be presented to supplement the basic financial statements. Such information is the responsibility of management and, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated February 13, 2024, on our consideration of the Bosque County Central Appraisal District's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering Bosque County Central Appraisal District's internal control over financial reporting and compliance.

Management's Discussion and Analysis

2022 FINANCIAL AUDIT

Management's discussion and analysis provides a narrative overview of the financial activities and changes in the financial position of the Bosque County Central Appraisal District (the "District") for the fiscal year ended December 31, 2022. Readers should use the additional required notes included in the standard financial audit of the District along with this information.

FINANCIAL HIGHLIGHTS

On December 31, 2022, the assets of the District exceeded its liabilities by \$623,527. Of this amount, \$621,008 was unrestricted net position which could be used to meet the District's ongoing obligations. The District's total net position increased \$107,108 over the prior year.

The resources available for appropriations were \$44,529 more than budgeted for the General Fund.

OVERVIEW OF THE FINANCIAL STATEMENTS

This discussion and analysis are intended to serve as an introduction to the District's basic financial statements. The District's basic financial statements comprise two components: (1) government-wide financial statements, which include the fund financial statements, and (2) notes to the financial statements. This report also contains other required supplementary information in addition to the basic financial statements themselves.

The statement of net position presents information showing how the District's net position changed during the fiscal year. All changes in net position are reported when the underlying event giving rise to the change occurs, regardless of the timing of related cash flows. Thus, revenues and expenses are reported in this statement for some items that will only result in cash flows in the future fiscal periods (e.g. uncollected appraisal assessments).

The District, like other state and local governments, uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements. The District's funds are governmental types. Governmental fund financial statements focus on current sources and uses of spendable resources, as well as on balances of spendable resources available at the end of the fiscal year. Such information may be useful in evaluating a government's near-term financing requirements.

Fiduciary funds are used to account for resources held for the benefit of parties outside the District. Fiduciary funds are not reflected in the government-wide financial statement because the resources of these funds are not available to support the District's own programs. The accounting used for fiduciary funds is much like that used for proprietary funds.

The notes provide additional information that is essential to a full understanding of the data provided in the financial statements. Additional information such as accounting policies, the retirement system, sources of revenue, activity in property and equipment, long-term debt activity and risk management are included in the notes to the financial statements.

On page 19 of this report a Statement of Revenues, Expenditures and Changes in Fund Balance – Budget and Actual is presented to demonstrate compliance with the annual appropriated budget.

FINANCIAL ANALYSIS

Our analysis focuses on the net position and changes in net position of the District's governmental fund activities.

DISTRICT'S NET POSITION

Economic Factors and Next Year's Budget

The 2023 adopted budget for the District is \$1,046,493, which is a \$256,656 increase from the prior year. Within budget categories, the expenses for salaries, employee benefits, auto expenses and maintenance contracts were the primary reasons for the increase.

Contacting the District's Financial Management

This financial report is designed to provide citizens, taxpayers, customers, and creditors with a general overview of the District's finances and to show the District's accountability for the money it receives. If you have questions about this report or need additional information, contact the District's business office at Bosque County Central Appraisal District, P.O. Box 393, Meridian, Texas, 76665.

BOSQUE COUNTY CENTRAL APPRAISAL DISTRICT

NOTES TO FINANCIAL STATEMENTS

DECEMBER 31, 2022

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Reporting Entity

The Board of Directors (the "Board"), a six (6) member group, is the level of government which has governance responsibilities to determine the Bosque County Central Appraisal District's (the "District") goals and serves as the decision making body for the operations of the District. The Board received funding from the various taxing entities which it serves. Because the Board of Directors are elected by the taxing entities which it serves, the District has the authority to make decisions, appoint administrators and managers, and significantly influence operations; and has the primary accountability for fiscal matters; the District is not included in any other governmental reporting entity.

In accordance with accounting principles generally accepted in the United States of America ("GAAP"), the District's financial statements include all funds, account groups, agencies, boards, commissions and other organizations over which the Board is financially accountable. In addition, component units which may be included are organizations for which the nature and the significance of their operational or financial relationship with the District is such that exclusion would cause the District's financial statements to be misleading or incomplete. As a result of applying the entity definition criteria noted above, no organizations (component units) have been included or excluded from the District's financial statements.

In 1979, Central Tax Appraisal Districts were voted into existence by the Texas Legislature. Effective August 14, 1981, House Bill 30 made revisions to the Property Tax Code that governs the operations of Central Tax Appraisal Districts.

The management of Bosque County Central Appraisal District is responsible for the accuracy and internal consistency of the preparation of the financial statements and notes contained in this annual report.

Government-wide and Fund Financial Statements

The District has implemented the financial reporting model as required by the provision of GASB Statement No. 34, *Basic Financial Statements and Management's Discussion and Analysis for State and Federal Governments*.

The statement of net position and the statement of activities are government-wide financial statements. They report information on all of the District's non-fiduciary activities with most of the interfund activities removed. *Governmental activities* include programs supported primarily by entity payments and other intergovernmental revenues.

The statement of activities demonstrates how other people or entities that participate in programs the District operates have shared in the payment of the direct costs. The "charges for services" column includes payments made by parties that directly benefit from services provided by the District.

The fund financial statements provide reports on the financial condition and results of operations for the governmental fund. Government-wide financial statements exclude fiduciary funds and component units that are fiduciary in nature.

Measurement Focus, Basis of Accounting and Financial Statement Presentation

The government-wide financial statements use the economic resources measurement focus and the accrual basis of accounting. Revenue is recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows.

Governmental fund financial statements use the current financial resources measurement focus and the modified accrual basis of accounting. With this measurement focus, only current assets, current liabilities and fund balances are included on the balance sheet. Operating statements of these funds present net increases and decreases in current assets (i.e., revenues and other financial sources and expenditures and other financing uses).

The modified accrual basis of accounting recognizes revenues in the accounting period in which they become both measurable and available, and it recognizes expenditures in the accounting period in which the fund liability is incurred, if measurable, except for un-matured interest and principal on long-term debt, which is recognized when due.

Miscellaneous revenues are recorded as revenue when received in cash because they are generally not measurable until actually received. Investment earnings are recorded as earned, since they are both measurable and available.

The District reports the following fund:

General Fund

The General Fund is the District's primary operating fund. It accounts for all financial resources except those required to be accounted for in another fund.

As a general rule, the effect of interfund activity has been eliminated from the government-wide financial statements.

Assets and Deferred Outflows of Resources, Liabilities and Deferred Inflows of Resources, and Net Position or Fund Balance

Cash and Investments

Cash consists of demand deposit accounts. The District currently has no investments.

Capital Assets

Capital assets, which include land, infrastructure, buildings and improvements, machinery and equipment, are reported in the applicable governmental activities columns in the government-wide financial statements. The District defines capital assets as assets with an initial, individual cost of more than \$1,000 and an estimated useful life in excess of one year. Such assets are recorded at historical cost or estimated historical cost if purchased or constructed. Donated capital assets are recorded at their acquisition cost, which is the price that would be paid to acquire an asset with equivalent service potential at the acquisition date.

The costs of normal maintenance and repairs that do not add to the value of the asset or materially extend assets lives are not capitalized. Major outlays for capital assets and improvements are capitalized as projects are constructed.

Buildings and improvements, and computers and equipment of the District are depreciated using the straight-line method over the following estimated useful lives:

<u>Asset</u>	<u>Years</u>
Computer and equipment	5-10
Right-of-use - building	5-10
Right-of-use - equipment	3-5

Fund Balance Classification

Governmental fund equity is classified as fund balance. The governmental fund financial statements present fund balances based on classifications that comprise a hierarchy that is based primarily on the extent to which the District is bound to honor constraints on the specific purpose for which the amounts in the respective governmental funds can be spent. The District adopted Governmental Accounting Standards Board (GASB) statement No. 54, *Fund Balance Reporting and Governmental Fund Type Definitions*, effective January 1, 2011. The classifications used in governmental fund financial statements are as follows:

- **Nonspendable:** This classification includes amounts that cannot be spent because they are either (a) not in spendable form or (b) are legally or contractually required to be maintained intact. Nonspendable items are not expected to be converted to cash or are not expected to be converted to cash within the next year.
- **Restricted:** This classification includes amounts for which constraints have been placed on the use of the resources either (a) externally imposed by creditors, grantors, contributors, or laws or regulations of other governments, or (b) imposed by law through constitutional provisions or enabling legislation.
- **Committed:** This classification includes amounts that can be used only for specific purposes pursuant to constraints imposed by formal action of the District. These amounts cannot be used for any other purpose unless the District removes or changes the specified use by taking the same type of action (ordinance or resolution) that was employed when the funds were initially committed. This classification also includes contractual requirements. As of December 31, 2022, there were no committed funds.
- **Assigned:** This classification includes amounts that are constrained by the District's intent to be used for a specific purpose but are neither restricted nor committed. This intent can be expressed by the District through the budgetary process. This classification also includes the remaining positive fund balance for all governmental funds except the General Fund. As of December 31, 2022, there were no assigned funds.
- **Unassigned:** This classification includes the residual fund balance for the General Fund.

Net Position

Net position represents the difference between assets, deferred outflows (inflows) of resources and liabilities. Net investment in capital assets consists of capital assets, net of accumulated depreciation, reduced by the outstanding balances of any borrowing used for the acquisition, construction or improvements of those assets, and adding back unspent proceeds. Net position is reported as restricted when there are limitations imposed on their use either through the enabling legislation adopted by the District or through external restrictions imposed by creditors or laws or regulations of other governments.

Deferred Outflows/Inflows of resources

The statement of net position and/or governmental fund balance sheet will sometimes report a separate section for deferred outflows of resources. This separate financial statement element, *deferred outflows of resources*, represents a consumption of net position that applies to a future period(s) and as so will not be recognized as an outflow of resources (expense/expenditure) until then. The District has the following items that qualify for reporting in this category:

- Pension contributions after measurement date – These contributions are deferred and recognized in the following fiscal year.
- The difference in changes of assumptions – This difference is deferred and amortized over a the average remaining service life for all active, inactive, and retired members.
- Difference in expected and actual economic experience – This difference is deferred and amortized over a closed five-year period.

In addition to liabilities, the statement of net position and/or balance sheet governmental fund will sometimes report a separate section for deferred inflows of resources. This separate financial statement element, *deferred inflows of resources*, represents an acquisition of net position/fund balance that applies to a future period(s) and so will not be recognized as an inflow of resources (revenue) until that time. The District has the following items that qualify for reporting in this category:

- The difference in expected and actual pension expense – This difference is deferred and recognized over the estimated average remaining lives of all members determined as of the measurement date.

- The difference in changes of assumptions – This difference is deferred and amortized over the average remaining service life for all active, inactive, and retired members.
- Difference in projected and actual earnings on pension assets – This difference is deferred and amortized over a closed five-year period.
- Difference in expected and actual economic experience – This difference is deferred and amortized over a closed five-year period.

Leases

The District is a lessee for two noncancellable leases of building and equipment. The District recognizes a lease liability and an intangible right-to-use lease assets in the government-wide financial statements. The District recognizes lease liabilities with an initial, individual value of \$5,000 or more.

At the commencement of a lease, the District initially measures the lease liability at the present value of payments expected to be made during the lease term. Subsequently, the lease liability is reduced by the principal portion of lease payments made. The lease asset is initially measured as the initial amount of the lease liability, adjusted for lease payments made at or before the lease commencement date, plus certain initial direct costs. Subsequently, the lease asset is amortized on a straight-line basis over its useful life.

Key estimates and judgments related to leases include how the District determines (1) the discount rate it uses to discount the expected lease payments to present value, (2) lease term, and (3) lease payments.

- The District uses the interest rate charged by the lessor as the discount rate. When the interest rate charged by the lessor is not provided, the District generally uses its estimated incremental borrowing rate as the discount rate for leases.
- The lease term includes the noncancellable period of the lease. Lease payments included in the measurement of the lease liability are composed of fixed payments and purchase option price that the District is reasonably certain to exercise.

The District monitors changes in circumstances that would require a remeasurement of its lease and will remeasure the lease asset and liability if certain changes occur that are expected to significantly affect the amount of the lease liability.

Lease assets are reported with other capital assets and lease liabilities are reported with long-term debt on the statement of net position.

Pensions

For purposes of measuring the net pension liability, pension related deferred outflows and inflows of resources, and pension expense, the District specific information about its Fiduciary Net Position in the Texas County and District Retirement System (TCDRS) and additions to/deductions from the District's Fiduciary Net Position have been determined on the same basis as they are reported by TCDRS. For this purpose, plan contributions are recognized in the period that compensation is reported for the employee, which is when contributions are legally due. Benefit payments and refunds are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value. Information regarding the District's Total Pension Liability is obtained from TCDRS through a report prepared for the District by TCDRS' consulting actuary, Milliman, in compliance with GASB 68.

Other Accounting Policies

The District allows employees to accumulate unused vacation leave and pays employees in good standing unused vacation leave of up to 625 hours. The District had a liability of \$22,212 for accrued compensated absences as of December 31, 2022. This balance is included in accrued liabilities in the Statement of Net Position.

Program revenues consist of taxes levied and remitted by entities within the District's jurisdiction.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results could differ from those estimates.

Change in Accounting Principle

GASB Statement No. 87, Leases, was adopted effective October 1, 2021. The statement addresses accounting and financial reporting for lease contracts. Statement No. 87 establishes standards for recognizing and measuring assets, liabilities, deferred outflows of resources, deferred inflows of resources, and revenues and expenses related to leases in the basic financial statements, in addition to requiring more extensive note disclosures. The adoption of this standard did not result in a restatement of beginning fund balance or net position, but assets, deferred inflows and liabilities were recognized, and more extensive note disclosures were required.

2. BUDGETARY DATA

The Board adopted an “appropriated budget” for the General Fund. The District is required to present the adopted and final amended budgeted revenues and expenditures for this fund. The District compares the final amended budget to actual revenues and expenditures. The General Fund Budget report appears on page 18.

3. LONG-TERM LIABILITIES

Lease Liabilities

A summary of the District’s leases payable as of December 31, 2022 are as follows:

Purpose of Lease	Interest Rate	Initial Year of Lease	Amount of Initial Liability	Interest Current Year	Amounts Outstanding 12/31/2022	Amounts Due Within One Year
Governmental activities:						
Right to use:						
Equipment - Building	3.0%	2017	\$ 71,642	\$ 300	\$ 42,767	\$ 13,641
Equipment - Copier	3.0%	2022	11,323	67	9,058	2,265
Total governmental activities			\$ 82,965	\$ 367	\$ 51,825	\$ 15,906

The future debt service requirements for the District’s leases payable are as follows:

Fiscal Year Ended December 31,	Governmental Activities	
	Principal	Interest
2023	\$ 15,905	\$ 477
2024	16,245	487

4. DEPOSITS AND CASH EQUIVALENTS

Custodial Credit Risk. In the case of deposits, this is the risk that in the event of a bank failure, the District’s deposits may not be returned to it. As of December 31, 2022, all of the District’s deposit balances were covered by Federal Deposit Insurance Corporation (FDIC) insurance and pledged governmental securities.

Interest Rate Risk. This is the risk that changes in the interest rates will adversely affect the fair value of an investment. At year end, the District was not exposed to interest rate risk.

Credit Risk. Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations. The ratings of securities by nationally recognized rating agencies are designed to give an indication of credit risk. At year end, the District was not exposed to credit risk.

5. DUE TO ENTITIES

During 1989, the Texas Legislature passed legislation, which requires all appraisal districts in Texas to refund excess fund balances (except restricted fund balances) to the entities at the year end. As of December 31, 2022, the District issued refunds in the amount of \$0 for the year 2022.

6. DEFINED BENEFIT PENSION PLAN

Plan Description

The District participates in the Texas County and District Retirement System (TCDRS), which is a statewide, agent multiple-employer, public employee retirement system. All full and part-time non-temporary employees participate in the plan. The TCDRS Board of Trustees is responsible for the administration of the statewide agent multiple-employer public employee retirement system consisting of more than 780 participating employers. TCDRS in the aggregate issues an annual comprehensive financial report on a calendar year basis. The annual comprehensive financial report is available upon written request from the TCDRS Board of Trustees at P.O. Box 2034 Austin, Texas, 78768.

All eligible employees of the District are required to participate in TCDRS.

Benefits Provided

TCDRS provides retirement, disability, and death benefits. The plan provisions are adopted by the governing body of the District, within the options available in the Texas state statutes governing TCDRS (TCDRS Act). Members can retire with five or more years of service at age 60 and above, with 30 years of service at any age, or when the sum of their age and years of service equals 80 or more. Members are vested after five years of service but must leave their accumulated contributions in the plan to receive any employer-financed benefit. Members who withdraw their personal contributions in a lump sum are not entitled to any amounts contributed by the District.

Benefit amounts are determined by the sum of the employee's contributions to the plan, with interest, and employer financed monetary credits. The level of these monetary credits is adopted by the Board of Directors of the District within the actuarial constraints imposed by the TCDRS Act so that the resulting benefits can be expected to be adequately financed by the employer's commitment to contribute. At retirement or disability, the benefit is calculated by converting the sum of the employee's accumulated contributions and the employer financed monetary credits to a monthly annuity using annuity purchase rates prescribed by the TCDRS Act.

Employees covered by benefit terms

At the December 31, 2021 valuation and measurement date, the following employees were covered by the benefit terms:

Inactive employees or beneficiaries currently receiving benefits	6
Inactive employees entitled to but not yet receiving benefits	10
Active employees	7
	<hr/>
	23

Contributions

The contribution rates for employees in TCDRS are either 4%, 5%, 6%, or 7% of employee gross earnings, as adopted by the employer's governing body. Participating employers are required to contribute at actuarially determined rates to ensure adequate funding for each employer's plan. Under the state law governing TCDRS, the contribution rate for each entity is determined annually by the actuary and approved by the TCDRS Board of Trustees. The replacement life entry age actuarial cost method is used in determining the contribution rate. The actuarially determined rate is the estimated amount necessary to fund benefits in an orderly manner for each participant over his or her career so that sufficient funds are accumulated by the time benefit payments begin, with an additional amount to finance any unfunded accrued liability.

Employees for the District were required to contribute 7% of their annual gross earnings during the fiscal year. The District contributed \$42,728 using the actuarially determined rate of 12.70% for the calendar year 2022.

Actuarial Assumptions

The Total Pension Liability in the December 31, 2021 actuarial valuation was determined using the following actuarial assumptions:

Inflation	2.50% per year
Real rate of return	5.00%
Long-term investment return	7.50%

The District has no automatic cost-of-living adjustments ("COLA") and one is not considered to be substantively automatic. Therefore, no assumption for future cost-of-living adjustments is included in the actuarial valuation. Each year, the District may elect an ad-hoc COLA for its retirees.

Mortality rates for active members, retirees, and beneficiaries were based on the following:

Depositing member	135% of the Pub-2010 General Employees Amount-Weighted Mortality Table for males and 120% Pub-2010 General Employees Amount-Weighted Mortality Table for females, both projected with 100% of the MP-2021 Ultimate scale after 2010.
Service retirees, beneficiaries and non-depositing member	135% of Pub-2010 General Retirees Amount-Weighted Mortality Table for males and 120% Pub-2010 General Retirees Amount-Weighted Mortality Table for females, both projected with 100% of the MP-2021 Ultimate scale after 2010.
Disabled retirees	160% of Pub-2010 General Disabled Retirees Amount-Weighted Mortality Table for males and 125% Pub-2010 General Disabled Retirees Amount-Weighted Mortality Table for females, both projected with 100% of the MP-2021 Ultimate scale after 2010.

The actuarial assumptions that determined the total pension liability as of December 31, 2021 were based on the results of an actuarial experience study for the period January 1, 2013 through December 31, 2016, except where required to be different by GASB 68. The economic assumptions were reviewed at the March 2021 TCDRS Board of Trustees meeting and revised assumptions were adopted. These revisions included reductions in the investment return, wage growth, and maximum payroll growth assumptions. The assumptions are reviewed annually for continued compliance with the relevant actuarial standards of practice.

The long-term expected rate of return on pension plan investments is 7.60%. The pension plan's policy in regard to the allocation of invested assets is established and may be amended by the TCDRS Board of Trustees.

The long-term expected rate of return on TCDRS assets is determined by adding expected inflation to expected long-term real returns and reflecting expected volatility and correlation. The capital market assumptions and information below are provided by TCDRS' investment consultant, Cliffwater LLC. The numbers shown are based on January 2021 information for a 10-year time horizon. The valuation assumption for long-term expected return is re-assessed at a minimum of every four years and is set based on a long-term time horizon; the most recent analysis was performed in March 2021. The target allocation and best estimates of geometric real rates return for each major asset class are summarized in the following table:

Asset Class	Benchmark	Target Allocation ⁽¹⁾	Geometric Real Rate of Return (Expected minus Inflation) ⁽²⁾
US Equities	Dow Jones U.S. Total Stock Market Index	11.50%	3.80%
Private Equity	Cambridge Associates Global Private Equity and Venture Capital Index ⁽³⁾	25.00%	6.80%
Global Equities	MSCI World (net) Index	2.50%	4.10%

Cash Equivalents	90-Day U.S. Treasury	2.00%	-1.05%

(1) Target asset allocation adopted at the June 2020 TCDRS Board meeting.

(2) Geometric real rates of return equal the expected return minus the assumed inflation rate of 1.80%, per Cliffwater's 2020 capital market assumptions.

(3) Includes vintage years 2006-present of Quarter Pooled Horizon IRRs.

(4) Includes vintage years 2006-present of Quarter Pooled Horizon IRRs.

(5) Includes vintage years 2006-present of Quarter Pooled Horizon IRRs.

Discount Rate

The discount rate used to measure the total pension liability was 7.60%, no change from the discount rate used in the previous year. The projection of cash flows used to determine the discount rate assumed that contributions from plan members and those of the contributing employers and the non-employer contributing entity are made at the statutorily required rates. Based on those assumptions, the pension plan's fiduciary net position was projected to be available to make all future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability. The long-term rate of return on pension plan investments is 7.60%. The long-term expected rate of return on pension plan investments was determined using a building-block method in which best-estimates ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation.

Sensitivity Analysis

The following schedule shows the impact of the Net Pension Asset if the discount rate used was 1% less than and 1% greater than the discount rate that was used (7.6%) in measuring the 2020 Net Pension Asset:

	1% Decrease 6.6%	Current Discount Rate 7.6%	1% Increase 8.6%
Total pension liability	\$ 2,063,069	\$ 1,871,600	\$ 1,705,888

Balance at 12/31/2021	<u>\$ 1,871,600</u>	<u>\$ 2,134,028</u>	<u>\$(262,428)</u>

⁽¹⁾ Reflects the change in the liability due to the time value of money. TCDRS does not charge fees or interest.

⁽²⁾ No plan changes valued.

⁽³⁾ Relates to allocation of system-wide items.

Pension Plan Fiduciary Net Position

Detailed information about the pension plan's Fiduciary Net Position is available in a separately-issued TCDRS financial report. The report may be obtained on the Internet at www.tcdrs.org.

Pension Expense and Deferred Outflows of Resources Related to Pensions and Deferred Inflows of Resources Related to Pensions

For the year ended December 31, 2022, the District recognized pension expense of (\$22,055). At December 31, 2022, the District reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

	<u>Deferred Outflows of Resources</u>	<u>Deferred Inflows of Resources</u>
Differences between expected and actual economic experience	\$ 10,700	\$ 6,373
Changes in actuarial assumptions	45,276	5,763
Difference between projected and actual investment earnings	-	250,066
Contributions subsequent to the measurement date	<u>42,728</u>	<u>-</u>
Total	<u>\$ 98,704</u>	<u>\$ 262,202</u>

\$42,728 reported as deferred outflows of resources related to pension resulting from contributions subsequent to the measurement date will be recognized as a reduction of the net pension liability for the year ending December 31, 2022. Other amounts reported as deferred outflows of resources related to pensions will be recognized in pension expenses as follows:

<u>Year Ended December 31,</u>	
2022	\$(29,381)
2023	(65,227)
2024	(59,598)
2025	(52,020)
2026	-
Thereafter	-

7. CAPITAL ASSETS

Capital Asset activity for the District was as follows:

	<u>December 31, 2021</u>	<u>Additions</u>	<u>Disposals</u>	<u>December 31, 2022</u>
Office equipment	\$ 6,571	-	-	\$ 6,571
Equipment	13,618	-	-	13,618
Computer and mapping system	110,508	-	-	110,508
Maps and other equipment	6,959	-	-	6,959
Right of use - building	29,700	41,942	-	71,642
Right of use - equipment	<u>11,323</u>	<u>-</u>	<u>-</u>	<u>11,323</u>
Total capital assets	178,679	41,942	-	220,621
Less accumulated depreciation:				
Capital assets	(133,586)	(1,551)	-	(135,137)
Right of use assets	<u>(18,975)</u>	<u>(12,165)</u>	<u>-</u>	<u>(31,140)</u>
Total net capital assets	<u>\$ 26,118</u>	<u>28,226</u>	<u>-</u>	<u>\$ 54,344</u>

Depreciation expense for the year ended December 31, 2022 was \$1,551.

8. ASSESSMENTS TO TAXING AUTHORITIES

Assessments to each taxing authority for its proportionate share of the District's budget are based on a ratio calculation made by the District prior to January 1 of each new calendar year. This ratio reflects the total tax levy of each taxing unit as a fraction of the total taxes levied within the entire District. These ratios are then applied to the approved budget of the District and billed to the taxing authorities on a quarterly basis. A summary of the assessments for the year ended December 31, 2022 is as follows:

Taxing Authority	Tax Levy in Thousands	Percent	Assessment
Bosque County	\$ 9,742	27.12%	\$ 214,217
Bosque Cty Hosp. Dist.	2,783	7.75%	61,194
Emergency Serv. Dist. #1	838	2.33%	18,432
Middle Trinity GCD	186	0.52%	4,091
Clifton ISD	8,272	23.03%	181,881
Cranfills Gap ISD	838	2.33%	18,422
Iredell ISD	1,474	4.10%	32,420
Kopperl ISD	1,890	5.26%	41,554
Meridian ISD	2,920	8.13%	64,204
Morgan ISD	840	2.34%	18,480
Valley Mills ISD	2,586	7.20%	56,860
Walnut Springs ISD	1,212	3.37%	26,645
Hico ISD	118	0.33%	2,588
China Spring ISD	364	1.01%	8,012
Jonesboro ISD	10	0.03%	219

INDEPENDENT AUDITOR'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH GOVERNMENT AUDITING STANDARDS

To the Board of Directors
of Bosque County Central Appraisal District
Meridian, Texas

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of the governmental activities and the major fund of the Bosque County Central Appraisal District, as of and for the year ended December 31, 2022 and the related notes to the financial statements, which collectively comprise Bosque County Central Appraisal District's basic financial statements, and have issued our report thereon dated February 13, 2024.

Report on Internal Control Over Financial Reporting

In planning and performing our audit of the financial statements, we considered Bosque County Central Appraisal District's internal control over financial reporting (internal control) as a basis for designing the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of Bosque County Central Appraisal District's internal control. Accordingly, we do not express an opinion on the effectiveness of Bosque County Central Appraisal District's internal control.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented or detected and corrected on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses or significant deficiencies may exist that were not identified.

Report Compliance and Other Matters

As part of obtaining reasonable assurance about whether Bosque County Central Appraisal District's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the financial statements. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.
